PROFILE

UX/UI Designer & Full-Stack Developer with 2+ years of experience crafting end-to-end digital products. I bridge user research, design systems, and software architecture—translating complex business needs into intuitive Figma interfaces, high-converting Webflow sites, and production-ready applications built with React, Next.js, Node.js, and PostgreSQL/Supabase.

WORK EXPERIENCE

	FOR IT CONSULTING - UX/UI DESIGNER	MONTERREY
SEP-2025 - JUL-2026	I lead the end-to-end product design process, starting in Figma with user research, flow mapping, and interactive prototyping supported by scalable design systems. I bring these experiences to life by building responsive, interactive websites in Webflow with SEO-optimized CMS architectures, or by directly converting designs into clean, accessible code using HTML, CSS/Tailwind CSS, and JavaScript or React, while maintaining a smooth workflow through Git and GitHub.	
	ARMEND SOLUCIONES - FULL STACK DEVELOPER	MONTERREY
FEB-2024- AUG-2025	I developed dynamic, modular user interfaces with React and Vue.js to optimize overall performance and user experience. On the backend, I designed and implemented scalable RESTful APIs and microservices using Express.js and Python. I also managed SQL and NoSQL databases while setting up Docker containers to streamline deployments, ensuring software stability through clean code, unit testing, and rigorous code reviews.
